

A step further in protecting your products...and your profits!

A GRIP SHEET Solution to ordinary slip sheet inherent problems.

Slip sheets were first used by large food processors in the 70's; It has now expanded into most industries and to every mode of transportation. The spreading of the Slip Sheet is explained by its many advantages, not neglecting lower cost, over the most widely used wooden pallets.

- Eliminate pallet during transportation
- Eliminate load slipping from the slip sheet
- Greatly helps overall load stability
- Can be used with Grip Sheets between layers to build the most solid loads
- Improve efficiency of packaging lines
- Eliminate multiple sheet feeding
- Made of virgin kraft to suit specifications
- Cost efficient

Grip'N Slip Sheet® is re-usable and fully recyclable
